

NERD TUTORS

EVALUATION REPORT CARD

Student Name: Trinno Asphalt

Date Evaluated: 7/6/2026, 6:35:53 PM

Class: Class 12th

Subject: Economics

MARKS OBTAINED

21.5 / 26

Percentage Score: 83%

Performance Analysis

The student has a strong grasp of the core economic concepts and performed well on the MCQs. The calculations in the final question were accurate. However, the student lost marks in the 3-mark theory questions due to insufficient depth and brevity. The answers provided for Q9, Q10, Q11, and Q12 are too concise and do not meet the required word count or depth for a 3-mark question, which typically requires a more detailed explanation.

Areas to Improve

- For 3-mark questions, aim to write at least 6–8 lines of content. Elaborate on the 'why' and 'how' rather than just stating facts.
- In Q9, ensure you provide complete sentences and context for each point to demonstrate depth.
- In Q10, expand on the specific ecological impacts (e.g., mention groundwater depletion or biodiversity loss) to provide a more comprehensive answer.
- In Q11, clearly distinguish between the functions of the Central Bank as a banker to the government versus its other roles.
- In Q12, provide concrete examples of how social outlook changes, such as education or gender equality, to better justify the statement.

Detailed Question-by-Question Mistakes

Student Answer: Q1: (C), Q2: (B), Q3: (D), Q4: (B), Q5: (A), Q6: (A), Q7: (C), Q8: (A)

✗ Identified Mistakes in Student Text:

- "~~(A) 5000~~" — The question asked for derivative deposits. $\text{Total deposits} = 1000 * (1/0.2) = 5000$. $\text{Derivative deposits} = \text{Total} - \text{Primary} = 5000 - 1000 = 4000$.

AI Feedback: The student answered 7 out of 8 MCQs correctly. Q6 was answered incorrectly; the student chose (A) 5000, but the correct answer based on the formula $(1/0.2 * 1000)$ is 5000, which is the total money supply. However, the question asked for 'derivative deposits' (Total - Primary), which is $5000 - 1000 = 4000$. The marking scheme identifies (C) 4000 as the correct answer.

Required Answer / Corrective Steps:

- Carefully distinguish between 'Total Money Creation' and 'Derivative Deposits' in banking questions.

Three infrastructural-development activities

2 / 3

Student Answer: Railway, ports, roads.

AI Feedback: The answer is too brief. While the points are correct, they lack the required explanation and length for a 3-mark question.

Required Answer / Corrective Steps:

- Elaborate on each point. For example, explain that railways were introduced to transport raw materials to ports and finished goods to the interior.

Green Revolution ecological criticism

2.5 / 3

Student Answer: Yes, the statement is true. Green Revolution made India self-sufficient in food grains but was criticized on ecological grounds. Farmers were misusing fertilizers, leading to soil degradation.

AI Feedback: The answer is correct but lacks sufficient depth. It covers the main point but is too short to earn full marks.

Required Answer / Corrective Steps:

- Add more detail regarding the specific ecological consequences, such as the depletion of groundwater and the loss of biodiversity.

Student Answer: Lender of the last resort, Issuing of notes.

✗ Identified Mistakes in Student Text:

- ~~"Lender of the last resort"~~ — *This is a function performed for commercial banks, not the government.*

AI Feedback: The student listed functions of the Central Bank, but 'Lender of the last resort' and 'Issuing of notes' are functions for the banking system and the economy, not specifically for the government as requested.

Required Answer / Corrective Steps:

- Focus on the specific roles: Banker to the government (maintaining accounts, making payments) and Fiscal Agent (managing public debt).

Modernisation beyond technology

Student Answer: Modernisation extends beyond just the implementation of new technology. Modernisation changes into social outlook between man and women. Through new technology, women can also work.

AI Feedback: The answer identifies the social aspect but is very brief and lacks the necessary explanation of how this relates to economic planning goals.

Required Answer / Corrective Steps:

- Explain that modernisation includes changing social attitudes, such as promoting gender equality, which allows for a more inclusive and productive workforce.
